

DNA SAMPLE DELIVERY INSTRUCTIONS

Blood sample's extraction and storage conditions

- Blood sample of 5 ml.
- Complete blood in EDTA tube.
- No centrifugation needed.
- Store at room temperature. Never freeze.

Sending the blood sample

The blood sample must be sent through a transport company to the following address:

Felix Claverie-Martin
FEA Unidad de Investigación (2ª Planta de Traumatología)
RenalTube
Hospital Universitario Nuestra Señora de Candelaria
Carretera del Rosario 145
38010 Santa Cruz de Tenerife
España

Proper actions must be taken so that the blood sample arrives between 9:00h - 14:00h Monday to Friday.

Blood samples must be accompanied by patient's basic data and the referring hospital official document assuming the conformity with the genetic study procedure cost.

Before sending the sample, it is imperative to contact the Research Unit of Hospital Nuestra Señora de Candelaria:

Félix Claverie Martín

Phone: (+34) 922 60 05 66
